## Type and Nature of Business

---

***Vertex Metal Construction LLC is one of the top mechanical engineering and metal fabrication companies in the UAE. Our company was found in Abu Dhabi in the year 1982. Vertex prides itself in delivering world class designs with the synergy of stable manufacturers and with customer solutions in mind.***

# Company Profile

**With more than 37 years of expertise in this field, our employees are equipped with knowledge and technical resources to solve all kinds of metal fabrication and manufacturing challenges. We take pride in accomplishing even the complex metal fabricating jobs to perfection.**

**Over the years, we have been delivering world class metal fabrication solutions in terms of designs and manufacture, according to our client requirements. We adopt some of the most advanced designing technologies and software to draft the components and models to their finer details.**

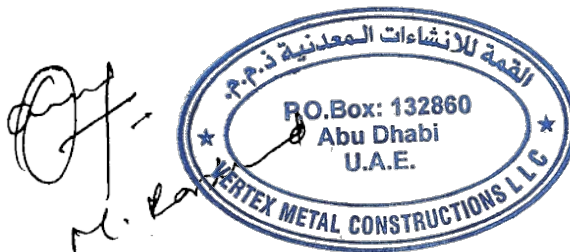

**Our engineers have many years of experience in this field, and they can visualize the fabricated components even before manufacturing them, and they can efficiently handle any complexities that could arise while designing and manufacturing the models,**

**With more than 37 years of experience in the field of steel metal fabrications, we have built long-term relationships with all our clients. Our work does not end at just designing, fabricating, and installation of products at your locations.**

**We also offer maintenance services in order to ensure durability and uninterrupted operations. Vertex Metal Construction LLC has made its name in the market by being honest on our commitments to our clients.**

**All our products are made to go through stringent quality parameters, which is why we have been accredited with numerous quality certifications. Our customers have always come back to us with more business, because we never compromise on the quality of products or services that we offer.**

**In addition to adding value to our customers on each and every given instance, we hold ourselves equally responsible for our employees' well-being and safety as well. Our workshops are designed according to the required health and safety standards, which is why our company has received many recognition certificates for health and safety.**

# Mission Statement

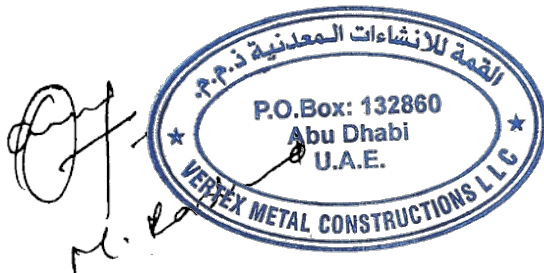

---

***To become a market leader in providing energy management and sustainable building design solutions and build a sustainable future. We believe that Sustainability is a way of life and not limited to buildings and infrastructure design. Sustainability should be part of every aspect of our lives.***

---

# Vision Statement

***Our vision is to conserve energy and make this world a more sustainable place meeting our present needs and also the needs of the future generations.***

# Environment, Health and Safety Policy

## COMMITMENT

VERTEX METAL CONSTRUCTIONS.LLC strives to provide a healthy and safe work environment. This is not just a moral and legal responsibility but also a prerequisite for the company to achieve its primary mission to conduct research, carry out analysis, providing consulting services and promote its strategic environment and health process at the highest international standards through the attraction and retention of high quality staff and other working partners. This commitment to protecting people and property also extends to ensuring company's operations do not place the community at any risk of injury, illness or property damage.

## POLICY STATEMENT

To achieve this, the managers & all key personnel shall:

- Adopting a risk management approach which is consistent with the nature of tasks and activities.
- Providing and maintaining safe workplaces, plant and systems of work;
- Treat the environmental aspects of any work activity with equal value to commercial and quality aspects.
- Comply with applicable EHS laws and regulations pertaining to the country of operation.
- Support the identification of environmental impacts in work activities.
- Ensuring Zero accidents, incidents or occupational harm by identifying hazards and assessing risks.
- Ensure that all members of the senior management have the prime responsibility for health and safety and they demonstrate this obligation through their actions.
- Encourage the reporting of unsafe acts & conditions and the actions to improve performance.
- Do their best to minimize the environmental impact of our activities by preventing pollution and minimizing waste.
- Investigate all events where injuries, damage to property or the environment has occurred including all near miss incidents where there was high potential to cause injury or damage.
- Providing and maintaining safe workplaces, plant and systems of work;
- Providing information, instruction, training and supervision to ensure safe systems of work;
- Ensuring that nominated safety personnel are adequately trained and supported;
- Consulting and cooperating with health and safety representatives, workers and others; providing and maintaining personal protective equipment as required; and continuously reviewing and improving its safety performance.

All people working within the company have an obligation to follow these principles fully. By doing so, we create a working culture that continuously strives to improve environmental performance and a working environment where harm is reduced to a level, which is as low as reasonably practicable.

MOHAMMED RASHID

Consultant's Comments:

No objection subject to

- Authorities regulations/requirements for project specs to be strictly followed.
- Materials & sp's to be submitted for review/Approval.

Corrections or comments made relative to submittals during this review do not relieve the contractor from compliance with the requirements of the drawings and specifications. This check is only for review of general conformance with the design concept of the drawings and general compliance with the information given in the contract documents. The contractor is responsible for confirming and coordinating all quantities and dimensions, selecting fabrication processes and techniques of construction; coordinating his work with that of other trades, and performing his work in a safe and satisfactory manner.
